Total organic carbon. State is asking for this because it supposedly impacts metal mobility in sediment. True or not true?

Gina/Steve,  
NPS requests sampling of the irrigation canal at Aztec Ruins National Monument. This historic feature is subject to protection under the National Historic Preservation Act. Please forward this to the appropriate individual.

Steve Monroe (sorry to one of you!) and Dana Hawkins can coordinate local logistics.

Please let us know if this request can be accommodated or whether existing data proximate to the location may satisfy our needs.

I'm about to board a flight but will be available after 5 mtn time.

Steve/Dana, please provide others your contact info.

Thanks!
